ROOFLINE

CONTENTS

HIGH QUALITY FASCIAS, SOFFITS, CLADDING AND ACCESSORIES HELP TO ADD THE ESSENTIAL FINISHING TOUCHES TO ANY ROOFLINE PROJECT

- **Eaves protector**
  A high quality, PVC eaves protector that ensures any roof underlay does not drape into the gutter. Eurocell eaves protector prevents water pooling behind fascia's and rotting of roof underlay in guttering thus reducing maintenance at eaves level - page 18.

- **3-in-1 felt support tray**
  The 3-in-1 felt support tray incorporates an integral over fascia vent and bird comb to promote air circulation and limit animal and insects entering the roof.

- **Hollow soffit**
  Our decorative hollow soffit board features in-built ventilation, helping to maintain airflow throughout your loft space - find out more on page 17.

ROOFLINE ANATOMY

A FASCIA
For our range of direct replacement fascia and capping boards, **go to page 8**

B DRY VERGE
Neaten up ragged roof edges with our dry verge range **on page 42**

C TRIMS
From corner trims to joint trims, find all you need to complete your roofline job **on page 14**
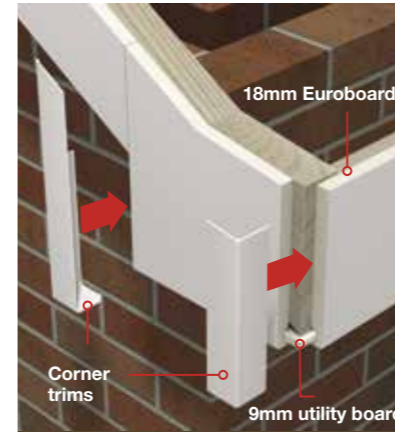

D SOFFITS
Choose from our range of plain and ventilated soffit boards **on page 16**

For more detailed information on our roofline range, including measurements and fitting instructions, please refer to our specification guide.

Call **08000 77 88 88** to request a copy, or download at **eurocell.co.uk**

INSTALLATION EXAMPLES

18mm Euroboard

Corner trims

9mm utility board

FASCIA BOARD
18mm fascia board installed on a gable box end, finished with corner **(DCBCT)** and joint trims **(DCBJT).**

SOFFIT BOARD
300mm vented hollow soffit board **(SB300)** allows air to flow freely in the roof space. This decorative board is complemented by sculpted 18mm ogee fascia boards **(OGE225).**

CAPPING BOARD
9mm capping board **(CB250)** with 9mm utility board **(UB300)** fitted to a new 6mm plywood substrate*.

***Our capping boards can be fitted over existing facsia boards, providing that they are sound.**

SIZE GUIDE

Our roofline products are available in various widths and thicknesses.

When we refer to **18mm** fascia board, we are talking about the **thickness** of the board.

The **width** of our fascia boards vary. In the example opposite, we show a **150mm** width board, but this particular product is available in widths up to 450mm – so you choose a size to best suit your project.

18mm

150mm
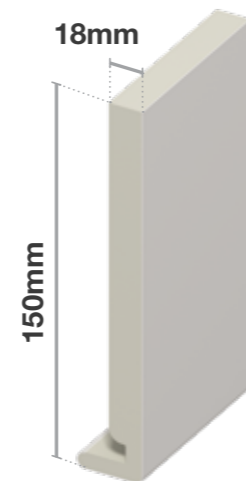

FITTING TIPS

FOILED AND LAMINATED BOARDS
All foiled and laminated boards should be fitted in lengths of **2.5m** maximum, to accommodate the expansion requirements – particularly on south facing elevations. Lift protective tape for inspection before installation.

CAPPING BOARD
Capping board should only be affixed to existing timber fascias if they are sound. Where the integrity of existing fascia is compromised, replace with a timber backboard and use timber fillets for additional support.
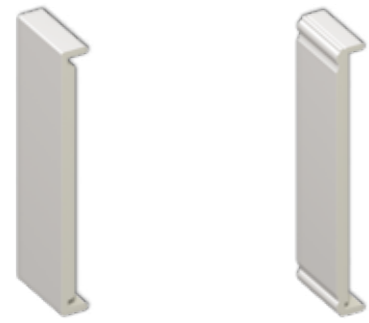

WHICH SEALANT?
Eurocell recommends Soudal neutral cure silicone sealants for all PVC-U roofline applications, for safe high-performance adhesion to PVC-U, masonry and polycarbonate.

See pages 70-71

easy-trim **RidgeF**

DRY FIX RIDGE KITS

MADE IN BRITAIN
- Available in various sizes - 3m, 6m and 10m
- Available in black, grey and terracotta to match most tile types
- BS 5534, BS 8612 and BS 5250 compliant
- Mechanically fixed, eliminating the requirement of mortar
- Simple installation, requires no special tools
- Resistant to wind and water

OVER FASCIA VENTS

MADE IN BRITAIN
- Each 500mm piece has a male and female end which interlock to create a 1m length
- Robust structure will not crush or warp
- Smooth leading edge for discreet fitting
- 10mm available for cold roof construction
- 25mm for warm roofs, flat roofs and pitches of 15° and below

BREATHER MEMBRANES

INDEPENDENTLY TESTED TO BS 5534 bre

- Suitable for warm and cold roofing construction
- 3 layer thermally bonded construction vapour permeable range
- BBA certified for warm and cold roof applications BBA 10/4753
- Conforms to BS 5534:2014 Annex A
- All our range is printed with a grid for simple cutting
- UV stable for 3 months
- High breathability and vapour permeable

BBA APPROVAL INSPECTION TESTING CERTIFICATION

easy-trim **Ridge F PLUS** 6 METRE BLACK

MADE IN BRITAIN

BIRD COMB FILLER
- Flexible and Durable
- Easy to Install
- Suitable for use with all profiled tiles
- Suitable for pitches between 15° - 50°

3 IN 1 EAVES TRAY

3-in-1 eaves trays incorporates an over fascia vent for adequate air ventilation, and a bird comb strip to combat bird and insect infestation.

INDEPENDENTLY TESTED TO BS 8612 bre

LEAD ALTERNATIVES LEAD R

Lead R

2 IN 1 EAVES TRAY

High-quality, 1 metre eaves support trays with an integrated 10mm over fascia vent.

MADE IN BRITAIN
- Reduces maintenance at eaves level by protecting the felt
- Protects felt from any UV degradation
- Easily cut and quick to fit
- Durable, no cracking or decay
- Can be used to replace worn or perished roofing felts
- No pitch limitations

CIRCULAR SOFFIT VENTS

MADE IN BRITAIN
- Made from polypropylene and available in five different colour options - black, brown, grey, tan & white
- Simple push-fit design for easy installation
- Grille design prevents ingress of large insects
- Can be retrofit
- Durable & resistant to decay
- Satisfies all NHBC requirements
- Manufactured to BS EN ISO 9001 : 2014
- Meets all relevant British Standards

BBA APPROVAL INSPECTION TESTING CERTIFICATION

CONTINUOUS RAFTER TRAY

MADE IN BRITAIN
- Universal rafter centre fitting capabilities
- Available in 4 widths - 300mm, 400mm, 600mm and 800mm
- Suitable for roof pitches of 15° or greater - select the size of roll to ensure it will fully restrain the thickness of insulation on the roof
- Flexible, quick and easy to install
- Suitable for new builds and refurbishment projects on roof pitches over 12.5°
- Highly durable light weight rolls
- Suitable for rafter spacing between 300 - 600mm centres
- Provides ventilation in accordance with the requirements of NHBC, BS 5250 and Building Regulations Document C2
- Provides the insulation from obstructing ventilation and provide 25mm per metre clear air gap
- Designed to fit common rafter centres of 400mm, 450mm and 600mm

INDEPENDENTLY TESTED TO BS 8612 bre

AVAILABLE IN 4 WIDTHS WITH A SMOOTH OR TEXTURED FINISH
- Lighter to handle and easier to install than traditional lead
- Cost effective
- Non-toxic
- No scrap value which eliminates the risk of theft
- Aesthetically maintains the 'classic' look of traditional lead
- Extremely malleable and easy to shape and form

easy-trim **Roofing & Construction Products**

The Choice is Easy... Choose Easy-Trim

Easy-Trim are all about quality, and never compromise on standards.

High performance products, excellent customer service, and attention to detail is what sets Easy-Trim apart.

- Consistently high-quality products, fully compliant to all relevant British Standards.
- Independent test reports… they matter more than you might think.
- British made - made to last!

Don't compromise on your materials, your reputation is everything.

Make life easy. Choose Easy-Trim, the brand you know and trust.

LIGHTWEIGHT ROOFING

CONTENTS

EUROCELL'S COMPREHENSIVE RANGE OF ROOF TILES ARE LIGHTWEIGHT AND EASY TO INSTALL. WITH 3 LEADING OPTIONS OF ENVIROTILE, TAPCO AND METROTILE, WE'VE GOT IT COVERED.

Adding to the growing range of lightweight roofing products, and new to the range, Eurocell has added Onduline corrugated roofing sheets.

- **Envirotile** is a revolutionary roof tile system developed by a roofer for roofers, and has a unique fixing system which is fully compliant with BS 5534. It's leading design means it requires just 12 tiles per m², and can be installed to a minimum of 12.5° pitch. A flat, precision manufactured, recycled polymer, lightweight roof tile with excellent green credentials.

- **Tapco** slate is a stylish range of traditional format roof tiles made from 100% virgin resins and limestone. A stylish addition to conservatory or other light weight roofing jobs, Tapco is extremely hard wearing, easy to fit and can be installed to a minimum of 14° pitch.

- **Metrotile** the lightweight steel roofing systems, pressed from the highest quality steel and providing a durable solution to all of your roofing needs. From small conservatories to large-scale new build projects.

- **Slateskin** The leading GRP sheet roof tile system from our Equinox conservatory roof system, which gives a traditional slate-effect in half the time is now available as a stand-alone product suitable for a range of domestic applications.

- **Onduline** The original bituminous roof sheet for renovating the roofs of a versatile mix of applications from garden sheds, pergolas, summer houses and workshops.

ENVIROTILE SLATE

Why choose Envirotile?

The lightest, biggest roof tiles on the market with a unique interlocking system that makes any job quick and easy to fix.

Unbreakable, dry cut tiles made from 75% recycled materials save hassle and environmental impact.

Performing on pitches as low as 12.5 degrees and good for all structures that can't handle a lot of weight, Envirotile is perfect whatever the job.

So whether the problem roof is a main frame or a lightweight conservatory, Envirotile is the answer.

TAPCOSLATE Classic

SLATE...
BUT NOT AS YOU
KNOW IT!

TapcoSlate Classic Coachman Mix Pictured

RECYCLABLE

Whether you have a conservatory, modern house or a listed building, TapcoSlate Classic adds splendour, elegance and tradition to your home.

It is authentically shaped with textured surfaces and riven edges moulded from authentic slates that makes TapcoSlate Classic almost indistinguishable from natural slate – yet it has an even more refined appearance. TapcoSlate Classic will not crack, break or delaminate, and its product formulation and manufacturing processes provide durability, performance, and longevity for many years to come.

TapcoSlate Classic is tested above and beyond UK and European standards and has the certification and results from the best testing houses in UK and European construction, for your peace of mind:

By providing a lightweight and easily-installed product, installation costs are lower, with less site waste!

DRY VERGE

Our Verge U is truly universal in that the units can be used on the left and right side of the verge, and they are fully compatible with most tile types. The unique design combines fast, simple installation with exceptional holding qualities. A tight secure fit is easily achieved ensuring roof tiles are held firmly in place and not vulnerable to wind dislodgement.

- Neatens roof edges

- An attractive weather and pest-proof finishing touch to any roof

- Can be retro-fitted to existing buildings to tidy roof edges

- The simple, secure clip fixing system makes it easy to install and avoids the problem of wind uplift

- Meets the mechanical fixing requirements of BS 5534

- None-handed units – can be used on both the left and right verge

- Unique design to create a completely sealed verge preventing water ingress and insect/bat infestation

- Manufactured from Polypropylene for excellent flexibility and UV stability.

ROOFING MEMBRANE

Easy-Trim Grafter Breather Membrane

A lightweight hybrid breathable roof underlay. Suitable for Warm and Cold roof application.

Code	Weight	Size
MEMBGRAFT50M	100gsm	1 x 50m
EASYTRIMGRAFT1.5	100gsm	1.5 x 50m
ETGRAFINTE120	100gsm	1 x 20m Integrated

Easy-Trim Pro Breather Membrane

Pro delivers performance and strength whilst still having a relevant price for most budgets. Suitable for Warm and Cold roof application.

Code	Weight	Size
MEMBPRO50M	122gsm	1 x 50m
MEMBPRO50M1.5M	122gsm	1.5 x 50m
ETPROINTE1	122gsm	1 x 50m Integrated

Easy-Trim Ultra Breather Membrane

Ultra provides further high performance with a heavier weight for strength, durability, and no gusting wind noise in all applications. Suitable for Warm and Cold roof application.

Code	Weight	Size
EASYTRIMULTRA1M	142gsm	1 x 50m
EASYTRIMULTRA15	142gsm	1.5 x 50m

Easy-Trim Non-Breath

Non-Breathe is a 2-layer, non-breathable roof membrane. Non-Breathe roofing membrane provides major benefits over 1F bitumen-based underlays and plastic under slating membrane. Typical applications are re-roofing projects, garages, and porches.

Code	Weight	Size
MEMBPRO45M	120gsm	1 x 45m
NONBREATHE15	120gsm	1.5 x 30m

Also available to order from Eurocell branches are the integrated tape range of membranes

Easy-Trim Master Breather Membrane

Master delivers performance and value for money whilst being lightweight and flexible. Suitable for Warm and Cold roof application.

Code	Weight	Size
EASYTRIMMAST1x50	112gsm	1 x 50m
EASYTRIMMAST1.5x50	112gsm	1.5 x 50m
ETMASTINTE1	112gsm	1 x 50m Integrated

Easy-Trim Maxi Breather Membrane

Maxi provides high performance with a heavier weight for strength, durability, and no gusting wind noise in all applications. Suitable for Warm and Cold roof application.

Code	Weight	Size
MEMBMAXI50M	132gsm	1 x 50m
EASYTRIMMAXI15	132gsm	1.5 x 50m
EASYTRIMMAXINT 1	132gsm	1 x 50m Integrated

Easy-Trim Fortis Breather Membrane

Fortis is a 4-layer reinforced heavyweight membrane. Complete with a built-in reinforcement grid. Suitable for Warm and Cold roof application.

Code	Weight	Size
EASYTRIMFORT1.5	160gsm	1.5 x 50m

Easy-Trim Vista Breather Membrane

Vista provides ultimate high performance with a real heavy-duty weight for strength, durability and no gusting wind noise in all applications. Suitable for Warm and Cold roof application.

Code	Weight	Size
MEMBVISTA50M	162gsm	1 x 50m
EASYTRIMVISTA15	162gsm	1.5m x 50m
EASYTRIMVISTINT1	162gsm	1 x 50m Integrated

FLASHING

FLASHING IS AN IMPERVIOUS MATERIAL INSTALLED TO WEATHERPROOF AREAS OF A STRUCTURE.

For roofing applications, lead is traditionally used, but we also offer lead free alternatives, which are suitable for rainwater harvesting.

CONTENTS

- **Midland Lead** - Eurocell offer an extended range of Lead Flashing from Midland Lead, with Code 3 – Code 8 available either in branch or to order. Lead can be used on various applications including Flat roofs, dormer, chimney flashing, cover flashing, lead valleys and soakers.

- **Bostik Flashband** Self Adhesive Flashing Tape for Roofs is a flexible bitumen strip that bonds instantly to most building materials to provide a permanent, watertight seal.

- **Easy Trim Lead-R** - BBA approved Easy Lead R and Easy Lead R Smooth are aluminium based, high performance, low cost flashing products. They are used as a replacement for traditional lead in flat and pitched roof applications.

- **Cromar Leadax** - Leadax is the first lead alternative in the World with the same properties as Traditional Lead. Leadax is not harmful to health or the environment. A second-generation lead alternative which is not only easier to use but also easier on your pocket.

Midland Lead

Bostik Flashband

Easy Trim Lead-R

Cromar Leadax

Lead remains the material of choice for roofing, weatherproofing, radiation protection and soundproofing.

• Malleable but durable and typically lasts over 100 years

• Sustainable and environmental friendly

• 100% recyclable

• Cost effective, practical and stylish

• Easy to use

• Adaptable and fit-for-purpose

• Available in codes and sizes to suit you

What Lead code you need for your next project

If you want to know what lead code to use and where, use our handy guide…

LEAD ALTERNATIVE – FLASHBAND

Flashband is easily applied using just hand pressure and a seam roller and is ideal for new build, maintenance and repair projects, including:

Roofing

- Replace damaged lead flashing
- Seal upstands and eve pieces
- Roof capping
- Edge flashing on roofing felt
- Repair roofing felt or joints on flat roofs

Drainage

- Seal or repair valley gutters, guttering and down pipes

Flashband has four layers of protection, meaning it's both tear and impact resistant and can withstand extreme temperatures of up to 100°C.

Four Layers of Protection

- Lacquer coating
- Heavy duty aluminium foil
- Tear resistant polyester membrane
- Polymer enhanced bitumen adhesive

TEXTURED FINISH

LEAD ALTERNATIVE - EASY LEAD R

BBA approved Easy Lead R and Easy Lead R Smooth are aluminium based, high performance, low cost flashing products. They are used as a replacement for traditional lead in flat and pitched roof applications.

Made of sheet aluminium with a protective anti-corrosion coating and a high-performance butyl adhesive on the underside. Installation is simple, with no special tools required it can be cut with a knife or scissors.

Easy Lead R has a unique corrugated pattern, so it is easy to form and to adapt to various surfaces; this malleability ensures the permanent water tightness of the product and an attractive appearance every time.

Easy Lead R Smooth has the same benefits and characteristics of Easy Lead R, only with a smooth finish thus effectively mimicking the appearance of traditional lead. Easy Lead R provides a permanent bond to brickwork, roof tiles and most popular construction materials.

Typical application
- Abutments
- Chimneys
- Dormers
- Saddles
- Soakers
- Stepped
- Valleys
- Windows and rooflights
- Valleys and gutters

LEAD-FREE FLASHING

LEAD ALTERNATIVE TO CODE 5 LEAD

Leadax is the first lead alternative in the World with the same properties as Traditional Lead

A non-toxic and sustainable product

Light weight

Longer roll lengths

Circular material

LEAD ALTERNATIVE - LEADAX

Leadax is the first lead alternative in the World with the same properties as Traditional Lead. Leadax is not harmful to health or the environment. A second-generation lead alternative which is not only easier to use but also easier on your pocket.

Features and benefits:

Cheaper - Leadax is cheaper to buy than traditional lead, and because Leadax is also faster to install, this leads to lower installation costs.

A non-toxic and sustainable product - Unlike traditional water-resistant materials, Leadax does not contain any heavy metals.

Circular material - The basic raw material is recycled PVB. PVB is the foil that is used in laminated glass (e.g. car windows or safety glass).

Light weight - Leadax is lighter than lead and therefore easier to use.

Longer roll lengths - Leadax is available in longer strips. So you can seal larger areas with less overlap, saving you materials and time.

Finish - Leadax comes in lead grey as standard. However, the product is also available in black, roof tile red and different colours are available, such as copper at an extended lead-time.

Durable - Leadax has the same natural look as traditional sheet lead, however it leaves no staining on roof tiles or masonry. The life expectancy is at least 20 years.

Certified - Leadax has been certified by BBA & KIWA.

FEATURES & BENEFITS

| Malleable, durable, waterproof and lightweight | Zero resale value, eliminating theft and vandalism | 20 years+ life expectancy | Requires no additional sealants or tape | High performance adhesive for a permanent bond | Resistant against corrosion and UV degradation | Smooth or textured finish | No special tools required - simply cut with a knife or scissors |
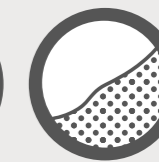

FLAT ROOFING

CONTENTS
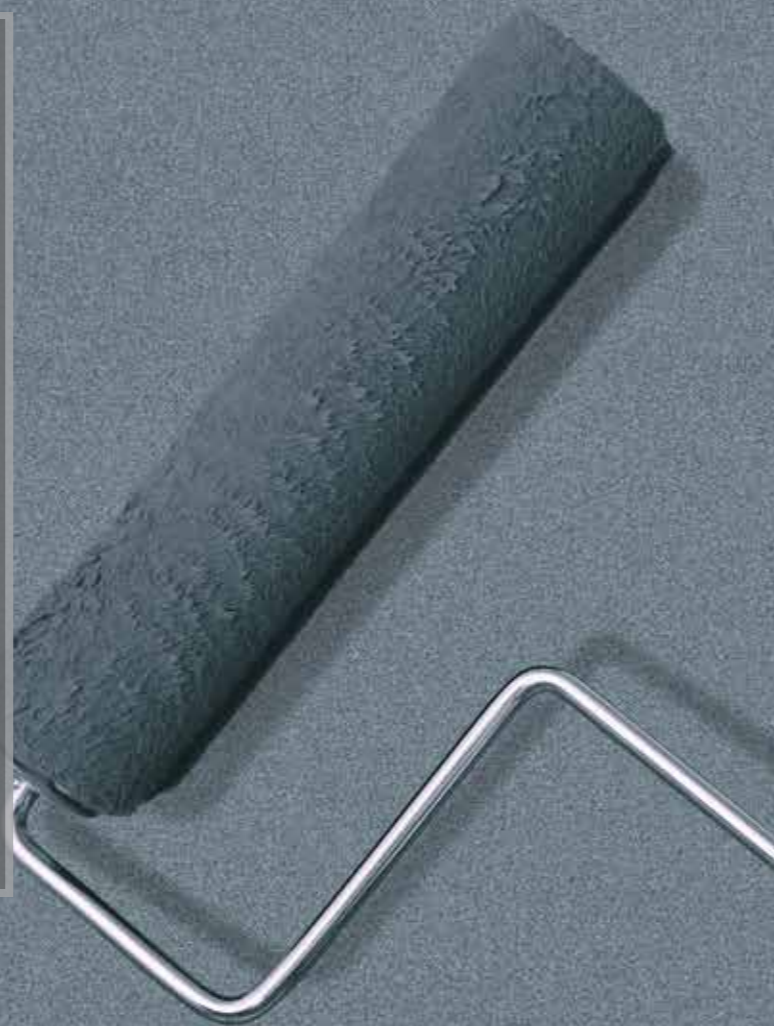

- **Elevate Rubber Cover™ EPDM** Flat roofing membranes for residential use.

- **Ultra Flex Liquid Flat Roof Waterproofing** is a single component liquid that cures through moisture contact and therefore is used directly from the container with no requirement for additional additives.

- **Cromar PRO GRP** is the professional choice for glass fibre flat roofing. Cold-applied and with high impact and fire resistance, it provides a seamless, highly durable, flexible and virtually maintenance-free finish for almost any flat roof surface. Pro GRP is available in component form.

- **HPX** TriRoof HPX is the ultimate Roofing Overlay System, designed to work all year round from the colder, wetter months and throughout the heat of the summer. TriRoof HPX can be applied effortlessly on nearly any surface and even on wet or damp substrates, meaning you don't have to plan your work around the weather.

- **Acrypol +** is The original instant waterproof solution for emergency leaks & failing flat roofs.

FLAT ROOFING SYSTEM

FLAT ROOFING - RUBBER

ELEVATE RUBBERCOVER™ EPDM FLAT ROOFING MEMBRANE FOR RESIDENTIAL USE.

Watertight & durable roofing solution

Excellent resistance to ageing (UV and ozone)

Excellent flexibility at low temperatures (-45°C)

Large dimension membranes significantly decrease installation time

Compatible with green roofing systems and photovoltaics

Repaired/extended easily during service-life

Successfully installed worldwide – from the arctic conditions of Siberia to the blistering heat of the Middle East, Elevate EPDM membranes ensure the water-tightness of tens of thousands of buildings.

Key Features & Benefits

- Watertight & durable roofing solution
- Excellent resistance to ageing (UV and ozone)
- High elasticity (>300% elongation)
- Excellent flexibility at low temperatures (-45°C)
- High puncture resistance
- Membrane and seams display high resistance to hydrostatic pressure
- Fire resistance to external sources (Low-Slope-Fire-Retardant EPDM)
- Inert (no solvents or plasticizers). The membrane composition remains constant over time
- Compatible with the collection of rainwater
- Resistant to micro-organisms
- Large dimension membranes significantly decrease installation time
- Reduced environmental impact compared to other waterproof membranes and in line with ecological requirements
- Compatible with green roofing systems and photovoltaics
- Easy installation and can be repaired/extended easily during service-life

ULTRA-FLEX HIGH PERFORMANCE LIQUID WATERPROOFING

BEST SELLER

New QUICK-CURE
Can be used to speed up the curing process and
COMPLETE THE JOB IN 1 DAY!

FEATURES & BENEFITS

Ultra Flex is a single component liquid that cures through moisture contact and therefore is used directly from the container with no requirement for additional additives.

It is ideal for	Benefits include
New roofs	Pre-mixed
	Excellent adhesion to most surfaces
Repair or refurbishment of existing roofs	Early rain resistance
	Cold weather application
	Easy wet-on-wet application
Flat & low pitched roofs	Easy to use with detail and awkward areas
	Flame/heat free application
Complex detailing	Highly elastomeric
	Reinforced & seamless
Box Gutters and Valleys	From small domestic to large commercial roofs
	Balcony systems available

Guarantees available from **15 to 25 years**

FLAT ROOF WATERPROOFING - PRO GRP

PRO GRP

No Joints, No Seams,
No Leaks

- HEAT RESISTANT
- FOOT TRAFFIC
- FIRE RESISTANT
- FROST PROOF
- STORM PROOF
- IMPACT RESISTANT

ASK IN-BRANCH ABOUT GRP TRAINING

CROMAR Building Products

GRP stands for Glass Reinforced Polyester, and is also known as Glass-Fibre.

This system is cold applied on site, giving it a seamless and flexible weatherproof finish that resists water, heat and frost. The resulting surface gives a strong architectural finish that looks very impressive. If maintained properly it will last as long as the building stands.

Cromar have developed this technology further to produce the perfect all-weather protection for any flat roof. PRO GRP can be applied in small domestic situations right through to large industrial environments.

The PRO GRP system is available in individual component form allowing the flexibility to buy exactly what's required for your next GRP roofing job.

ADVANTAGES:

- Flexible GRP for all types of common roofing substrates
- One resin for both base & topcoat
- Quick cure primer
- Uses a 225G chopped strand matting for the ultimate in flexibility
- Health & Safety conscious catalyst with easy application
- Suitable for both new decks & refurbishment projects
- Superior adhesion
- Unaffected by direct sunlight
- Approved contractor scheme
- 20 Year product warranty

FLAT ROOF WATERPROOFING - HPX

FEATURES & BENEFITS

Dark grey colour

Instantly waterproof even when it's raining - applies flawlessly to damp surfaces

Use it straight out of the tin - no mixing/no additional hardener

Applies to most common substrates - rubber, concrete, grp, asphalt

GUARANTEED 20 YEARS

TriRoof HPX is the ultimate Roofing Overlay System, designed to work all year round from the colder, wetter months and throughout the heat of the summer.

TriRoof HPX can be applied effortlessly on nearly any surface and even on wet or damp substrates, meaning you don't have to plan your work around the weather.

Once fully cured, HPX remains elastic and can stretch up to 300% of its original size, meaning any movement in the surface will not split or tear the membrane.

For an even tougher, more resilient roof, a layer of glass matting can be incorporated into the liquid to help bind the roof together. HPX is waterproof, UV resistant and has a 10 year guarantee. Adding a second layer with the HPX reinforcement kit will guarantee your roof for 20 years.

This product is cold applied and requires no additional hardener or mixing. It can be applied straight out of the tin. HPX is free of bitumen, solvent and isocyanates, making it kinder to the environment and its users.

FLAT ROOF WATERPROOFING - ACRYPOL

THE ORIGINAL INSTANT WATERPROOF SOLUTION FOR EMERGENCY LEAKS & FAILING FLAT ROOFS.

Refurbish failed industrial, commercial or domestic flat roofs

Easy to apply

Single coat application

Can be applied even during damp weather conditions

Fibre reinforced

The original instant waterproof solution for emergency leaks & failing flat roofs. Acrypol+ is a total roof coating waterproof system developed to refurbish failed industrial, commercial or domestic flat roofs and is also ideal for general property maintenance as well as patching repairs. Brush applied as a semi liquid paste; it dries to form an ultra-tough, seamless flexible overlay. Acrypol+ known as the original waterproof coating, can be applied during damp weather conditions and still provide a long-term solution to waterproofing problems, including flat roof repair.

Acrypol+ can be applied during damp weather conditions and at the same time provide a long-term solution to the problem. The all-weather application properties, combined with the simplicity of application, makes this product a particularly attractive proposition to those employing their own labour force for general property maintenance. The versatility of Acrypol+ is acknowledged widely by Municipal Authorities and Maintenance Contractors throughout the United Kingdom.

How does Acrypol+ work?

Acrypol+ is an acrylic resin dispersed in a solvent to form a semi-liquid paste. The coating film dries into a tough durable elastic overlay that prevents the passage of water yet is chemically structured to allow trapped moisture to evaporate, thus avoiding the formation of blisters. A specific feature is incorporated with added fibres, fibres that act like a built-in scrim. These fibres interlace when the coating is applied – filling and bridging gaps and cracks (up to 10mm wide). The fibres increase the tensile strength of the dry film making it more durable - a big plus!

- One-coat instant waterproof coating

- Dry and damp application

Can be used on a variety of surfaces:

Flat Roofs, Asphalt, Bituminous surfaces, Brickwork, Gutters, Leadwork, Metals, PVC, Asbestos, Glass, Roofing felt, Rooflights, Concrete, Fibreglass.

Coverage: 1-2kg/m² average

Drying time: 2-3 days depending on ambient temperature and ventilation

Colour Options: GRY Medium Grey, BLK Black

INSULATION

Loft Roll

The Isover Space Saver Roll is a glass mineral wool that provides thermal insulation. It is used at the joist level for cold roof applications. The thermal conductivity of the roll is 0.044W/mK which helps to reduce heat loss.

Code	Size
LOFTROLL44100	100mm 12m x 1.16m
LOFTROLL44	150mm 8m x 1.16m
LOFTROLL44200	200mm 5.2m x 1.16m

Tapered Edge Plasterboard

Tapered Edge Plasterboard is a gypsum board for partitions, linings and ceilings where normal fire, structural and acoustic levels are specified. The board provides a hardwearing baseline protection for interior walls. The versatile material has many benefits both functionally and aesthetically, and it pairs perfectly with a range of floor finishes.

Code	Size
WALLBOARD125	1800 x 900 x 12.5mm
KNWB125	2400 x 1200 x 12.5mm
EX553AB3 Expamet 553 T/Coat Angle Bead	2.4mx3mm
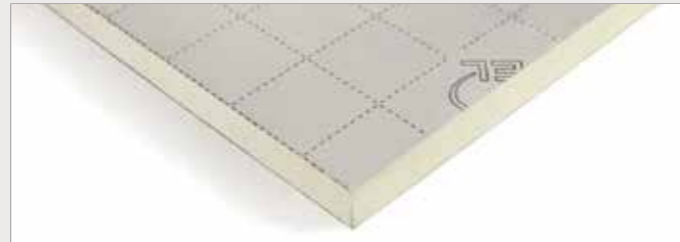

PIR Board

High performance PIR insulation board that is lightweight, easy to cut, handle and install. Whether it's a pitched roof, framed wall or floor, PIR is the ideal solution among contractors and installers.

Code	Size
INSUL25	2400 x 1200 x 25mm
INSUL50	2400 x 1200 x 50mm
INSUL60	2400 x 1200 x 60mm
INSUL75	2400 x 1200 x 75mm

INSUL100	2400 x 1200 x 100mm
INSUL120	2400 x 1200 x 120mm

PIR Insulated Plasterboard

The PL PIR Board combines in itself an insulation and plasterboard in one single, handy and durable board. Suitable for internal wall insulation and pitched roof applications, this insulation board is consistently sized with extremely tight tolerances, ensuring thermal bridging is minimised. Factory bonded, the plasterboard provides optimum board dimensions and optimum adhesion between layers.

Code	Size

FLAT ROOF WINDOWS

The ideal solution for providing
natural daylight

The benefits of natural illumination of buildings are unquestionable but in those with flat roofs it is not always possible to install sufficient standard vertical windows. A source of natural light should be available in any living space to make its occupants feel comfortable. The ideal solution for providing light is the installation of specially designed products for flat roofs.

GUARANTEED 10 YEARS

CONSERVATORIES

A SUPERB SELECTION OF CONSERVATORY ROOFS TO SUIT EVERY HOME, PLUS CONSERVATORY ACCESSORIES AND CANOPIES

SKYPOD LANTERN ROOF

CONTENTS

- **Equinox tiled roofs** transform your customers' conservatories from an under-used room into a cosy, welcoming space that provides complete comfort all year round - find out more on page 98

- **Skypod** lantern roofs with a **NEW** acute design option now available, Skypod lantern roofs have never looked better. Why not offer your customers sleek, contemporary design with Skypod today? - find out more on page 108

- **Polycarbonate roof glazing** - offers a great cost saving solution to traditional glass options - find out more on page 114

TILE ROOF SYSTEMS

The Equinox tiled roof is the perfect solution. Combining high-quality precision engineering with attractive styling inside and out

Transform under-used conservatories into usable living spaces - 24/7, 365 days a year

GUARANTEED 10 YEARS

- **Energy efficiency** with new high performance styrene helps boost overall roof energy efficiency and thermal insulation to keep the room below comfortable enough to use at any time of year

- **Structural strength** Upgraded boarding in the roof system sandwich increases overall strength to allow larger areas without risk of sagging

- **No job is too small** - Equinox isn't just a great system for conservatory roofs either. This versatile solution can also be used to transform flat roofs – whether you are building a new extension or you have an existing flat roof that's ready for a change.

Metrotile steel roof tiles

Steel tiles come as standard, and are lightweight and available in a choice of colours to suit many house styles.

METROTILE COLOUR OPTIONS

CHARCOAL | ANTIQUE RED | BURNT UMBER | MOSS GREEN | EBONY

Tapco Classic composite roof tiles

Composite tiles offer the authentic look of traditional slate tiles without the risk of shattering, fading, warping or cracking.

TAPCO COLOUR OPTIONS

LUMA FLAT ROOFLIGHT

Our new aluminium flat rooflight is designed for now and for future with low-carbon heating and world-leading levels of energy efficiency.

Luma is built to withstand everything the British weather can throw at it.

Suitable for multiple projects, such as existing or new flat roof extensions, garage conversions, new builds, garden rooms and more.

Made-to-measure.

Available in square and rectangular designs.

From 500mm to 1400mm projection

From 500mm to 1400mm wide

From 500mm and up to 3000mm projection

From 500mm to 1400mm wide
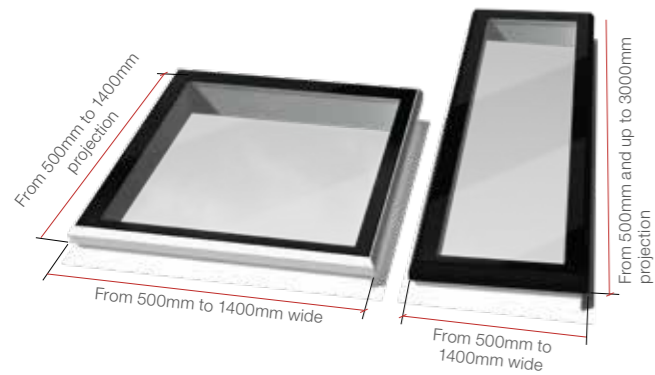

Max glass area 2.5sqm
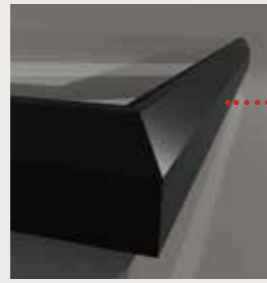

Weather-resistant powder-coated frame

The aluminium frame is powder coated for durability and has a UV-resistant, weather-tight seal.

Tinted laminated glass options

Tinted glass still allows the light to flood in but reduces uncomfortable glare from sunlight.

Secured from the inside

Exclusive to Luma

The only flat rooflight which is fixed from the inside for added security. Excellence in quality with 6.8mm laminated internal glass and 6mm toughened external self clean glass for added safety.

Slimline modern profile with sleek seamless glazing

Exclusive to Luma

WHITE
Grey interior
WITH ALUMINIUM RAFTER TOP CAPS. AVAILABLE IN BLACK, WHITE & GREY.

Skypod Plus is an addition to the successful Skypod range. Building on the existing purpose designed thermally broken aluminium ridge and ring beam, Skypod Plus now offers aluminium rafter top caps powder coated in smooth grey and white, to sit alongside the existing black. This means the whole of the external face offers stunning architectural aesthetics. All internal bars are capped in the conventional way with PVC-U and are available in white, grey or black finish.

Skypod Plus is available in 2 or 3 bar options and square shaped. The system has a fixed roof pitch of 20° and is supplied in a choice of five self-cleaning, temperature controlling glass options, with a centre pane U-value of 1.0W/m²K achievable.

The contemporary and balanced aesthetics on Skypod Plus have been achieved by avoiding the use of bulky end caps, crestings and finials, which are incorporated into lantern roofs when using standard conservatory components.

SKYPOD PLUS STYLE & SIZE OPTIONS

Available in 20° fixed pitch
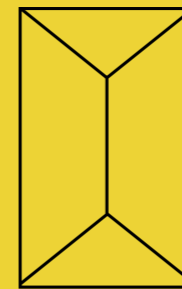

No 'side-bars' needed on sizes up to 1.5m × 2.75m

Up to 1.5m × 7.45m
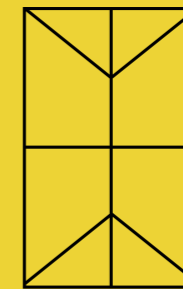

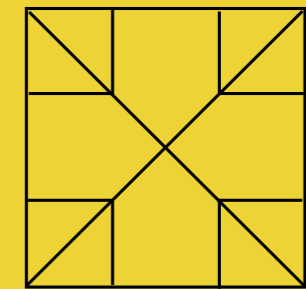

Up to 2.75m × 8.7m

Up to 2.75m × 8.7m
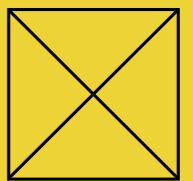

Up to 1.5m × 1.5m

Find out more at eurocell.co.uk/skypodplus

* Black and grey internal finishes on Skypod Plus are produced by a spraying process

ROOF GLAZING

Standard and bespoke polycarbonate, and roof panel ranges

- Ready to use

- Mould resistant

- Suitable for a wide variety of applications including conservatory roofs

- Lightweight and excellent impact resistance

- Weather and UV resistant

- Superb thermal insulation

POLYCARBONATE SHEETING

Multiwall Polycarbonate is an extensive range of sheeting in various thickness and sizes.

Multiwall Polycarbonate is co-extruded with a full UV protection layer offering high levels of impact resistance. The energy saving, lightweight sheeting is ideal for use in conservatories, canopies, curved roof lights and much more. Our standard range includes 10mm Twin Wall Polycarbonate and 16mm, 25mm and 32mm Multiwall Polycarbonate. A bespoke range of sizes can also be ordered in branch.

Multiwall Polycarbonate is the most widely used form of polycarbonate, often used for conservatories and lean-to roofs. The various layers it's made up from provides superb thermal insulation, also providing relatively good sound insulation. For Timber supported roofs we would recommend 10mm to 25mm polycarbonate, whereas 16mm to 35mm polycarbonate for self-supporting roofs.

Thickness	U-Value (W/m2k)	Light Transmission (%)	
		Clear	Opal
10mm Twinwall	3.2	82	40
16mm Multiwall	2.4	77	42
25mm Multiwall	1.4	62	28
32mm Multiwall	1.3	63	33

You can also use polycarbonate for other glazing requirements. Some examples include sport shelters, bike racks and security barriers. This demonstrates the versatility of polycarbonate sheets.

Silirub PC

Silirub PC is a neutral low modulus silicone sealant specially developed for sealing and waterproofing on polycarbonate.

Clear

- Does not cause stress cracking in nonprestressed acrylic glass (Plexiglas) and polycarbonate (Makrolon, Lexan).
- Colourfast and UV resistant
- Very low emission, EC1+ certified
- Permanently elastic after curing
- Slow skinning time
- Not paintable
- Not suitable for natural stone

New

EASY, FAST AND SAFE INSTALLATION

Joint

THE NEW EZ GLAZE

EZ Glaze is an attractive and user-friendly solution for flat roof design, clear patio roofs and DIY polycarbonate roof panels. Offering a smart design, elegant glass-like appearance, low maintenance and sustainable performance, all in a fast easy to install system.

The 3mm thick polycarbonate sheets fit directly over rafters with a high loading capacity. Simply fasten the panels to the supportive structure and join by overlapping with no need for glazing bars or joints.

FEATURES AND BENEFITS

Clear and elegant appearance

Minimal maintenance

UV Protection - blocks 99.9% of UV radiation

Greater hail resistance

High wind and snow load resistance

No need to climb on the roof to install

CAST IRON EFFECT GUTTERING

A stylish range of guttering and downpipe products

GUARANTEED 10 YEARS

A DECORATIVE EFFECT THAT COMBINES THE LOOK OF A TRADITIONAL CAST IRON SYSTEM

- Quick to install and ready to fit without the need for painting or protective coatings

- Reduced total installation cost. (No metal primer, spanners, paint, or disc cutters required)

- Durable and long-lasting finish without the need to apply corrosion control traditionally used with cast iron systems

- UV stabilised to protect against colour fade

- Lightweight construction for easy handling, assembly and installation

- Stylish and functional, making the range suitable for new build and residential projects

CAST IRON EFFECT 112MM PVC-U

The Cast Iron Effect System offers a high capacity rainwater solution while still benefiting from the timeless appearance of a Cast Iron Effect rainwater system. Its deep semi-elliptical profile means it can be used on most domestic applications.

FLAT ROOF - WATERPROOFING LIQUID

ULTRA-FLEX HIGH PERFORMANCE LIQUID WATERPROOFING

ULTRA FLEX

BEST SELLER

New QUICK-CURE
Can be used to speed up the curing process and
COMPLETE THE JOB IN 1 DAY!

FEATURES & BENEFITS

Ultra Flex is a single component liquid that cures through moisture contact and therefore is used directly from the container with no requirement for additional additives.

It is ideal for	Benefits include
New roofs	Pre-mixed
	Excellent adhesion to most surfaces
Repair or refurbishment of existing roofs	Early rain resistance
	Cold weather application
	Easy wet-on-wet application
Flat & low pitched roofs	Easy to use with detail and awkward areas
	Flame/heat free application
Complex detailing	Highly elastomeric
	Reinforced & seamless
	From small domestic to large commercial roofs
Box Gutters and Valleys	Balcony systems available

Guarantees available from **15 to 25 years**
